MULTI PURPOSE JUNCTION BOX

Industrial junction box for use in hazardous areas with MI heating cables when large terminal sizes are required. This box can be used to make connections between power cables, heating cables and cold lead cables. Depending on the configuration of the system, the box can accommodate multiple heating cables/cold leads and a power cable.

The M32 glands are already present in the case of factory terminated heating units. In case of on-site assemblies, refer to DOC-606 for detailed information about the required accessories.

Cable connection is accomplished via DIN rail mounted screw terminals from Weidmüller to provide safe, reliable and maintenance-free operation.

The box can be wall mounted via the four holes moulded in the base of the box.
